1. A new steel-rolling plant within the Rákosi Works, Csepel was to start production in September 1952. The lay-out is similar to the steel-rolling mill in Dicsőgyőr, but it is reported to be larger. The plant consists of three sheds, 250 m. in length, as well as other workshops and an office building for the management. Two of the three sheds are to be used for steel rolling and the third for tube-forming. The machine tools of East German origin have already arrived.
2. Components for tanks and guns are scheduled for manufacture in this plant, which is called Csőgyár (Tube Factory).
